North American Enclosures™

ARCHITECTURAL SCREENING SOLUTIONS

POST MOUNTED SCREEN SYSTEM

HORIZONTAL RIB PERFORATED PANEL SHOWN

STATEMENT

When zoning codes or design guidelines require the concealment of rooftop equipment, our Post Mounted Screen System provides a flexible, freestanding solution. The system is supported by structural posts mounted to the roof structure and incorporates sliding panels to allow convenient access for equipment service and maintenance. Ideal for concealing multiple pieces of equipment within a single screen, these systems are suitable for both new construction and retrofit applications.

SCREEN HIGHLIGHTS
